DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant admitted prior art in figure 4 (hereinafter APA').

APA' discloses an optical plug frame for an optical connector component [figure 4] comprising:

- the plug frame comprises a first plug frame [5] and a second plug frame [6];
- the optical connector component comprises a ferrule [2] having two ends for receiving end portions of core optical fibers of fiber optic cables of first and second optical connector components [not shown];
- the plug frame floating supporting the ferrule [figure 4] and the plug frame being configured as a two-pieces component;
- a first engagement portion [12] formed in the first plug frame [5] reads on applicant's first engagement portion formed at one side of the plug frame for engaging with the first optical connector component;

Art Unit: 2839

- a second engagement portion [18] formed in the second plug frame [6] reads on applicant's second engagement portion formed at another side of the plug frame for engaging with the second optical connector component;
- wherein the plug frame [5, 6] connects the optical fibers of the first and second optical connector components when the first and second optical components are engaged with the plug frame;
- the plug frame further having a first abutment portion [an inner surface of a brim 10] for restricting moment of the ferrule in one direction and a second abutment portion [20] for restricting moment of the ferrule in opposite direction; and
- a flange [8] affixed to an outer peripheral of the ferrule abuts against the first abutment portion and second abutment portion via a connection sleeve [3].

APA' discloses the instant claimed invention except for the plug frame is a one-piece component. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the two pieces component of the plug frame in APA' to provide a single piece plug frame for the purpose of facilitating the manufacture, assembly and reducing the costs, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 U.S. 164 (1893).

Response to Arguments

3. Applicant's arguments with respect to claims 1 and 3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
